

AZIZA WORLD SHEA BUTTER

Care Instructions:

1. Wash hands before use. This will prevent contaminating the Shea butter and prolongs its shelf life.
2. Store at room temperature and away from sunlight. If your Shea butter liquefies place in the freezer for about 15 minutes and then allow it to return back to room temperature. This will restore its whipped texture.
3. If your body butter ever becomes frozen, do not throw in microwave! Give it time to return to room temperature before using again.
4. My Shea butter is Organic and derived from mostly unrefined carrier oils. It contains no added preservatives or additives, thus giving it a shelf life of 3 to 4 months although it lasts longer when properly stored.
